

***How does Matrix RF™ fractional skin resurfacing work?***

Frequency energy is precisely directed to tiny matrix spots. The RF energy causes a controlled skin injury which is maximized in the region of the matrix spots with an accelerated healing process supported by the tissue surrounding the matrix spots.

Post treatment, you may notice increased levels of beneficial collagen and new healthy skin cells are produced. Mild to moderate wrinkles and superficial discolorations are reduced, and the texture of your skin becomes smoother and more elastic.

***Is fractional skin resurfacing right for me?***

Treatment is a safe and effective solution for most skin types--check with your physician to see if you are a good candidate.

***When can I expect to see results?***

Typical treatment protocol is 3 treatments, 4-6 weeks apart. The total number of required treatment sessions depends on your skin's condition.

***Does it hurt?***

Matrix RF treatment is very tolerable. During treatment, many patients experience a prickly sensation as energy enters their skin. After treatment a pink or red "sunburn" appearance and feeling is also common. Topical anesthetic ointment and cooling are used to reduce unpleasant sensations during treatment.
